

Cataloguing Corporate Commitments to the Sustainable Development Goals

Project Title	Cataloguing Corporate Commitments to the Sustainable Development Goals
Project Summary	Research the Fortune 100 global companies' activities and commitments with regard to the UN sustainable development goals (SDGs) and create a reference database that catalogs CSR and public-private partnerships as they apply to the goals.
Country	United States
Agency	Department of State
DoS Office	S/GP
Post	N/A
Section	N/A
Number of Interns	1

Project Description

A critical mechanism for strengthening diplomatic connections and promoting economic growth, public-private partnerships are an especially effective tool in fostering innovative solutions to address the Sustainable Development Goals (SDGs) – the 15-year global agenda 193 countries adopted in 2015. As the entry point for collaboration between the U.S. Department of State and the private sector, the Secretary's Office of Global Partnerships aims to develop a database or comprehensive document that tracks the world's top global corporations and their activities with regard to the SDGs. This database will directly support our goals to build partnerships around the Secretary of State's priorities and to advise the Department's bureaus, offices, and embassies around the world on collaborating with corporate partners.

The e-Intern will be asked to review public sources such as Corporate Sustainability Reports, annual reports, 10-Ks, and press releases from Fortune 100 companies. Reporting to a supervisory Partnerships Specialist, the e-Intern should collect and consolidate the information in a format that sorts the data by the 17 SDGs, the name of the company, the industry, and the location of activities. The e-Intern will collaborate with the Partnerships Specialist to design a database using MS office products so that it can be easily accessed and amended in the future.
